Introduction

This is a short demonstration document compiled by **pdf-compiler**.

What this shows

The compiler stitches together:

- A title page
- A table of contents (clickable in the PDF)
- Markdown sections (this one) with auto-indexed headings
- A divider / header page
- A second markdown chapter
- An image gallery

Why YAML

YAML keeps the build spec readable and lets you version it alongside the content.

```
sections:  
  - type: title  
    title: "Annual Report"
```

A nested heading

This nested heading appears as a sub-entry in the ToC.

Part II — Financials

A heavily-bookmarked section

This divider page is generated from markdown. The next section is a multi-heading markdown chapter; every heading becomes a ToC entry automatically.

Financials Overview

Some hypothetical numbers.

Q1

Revenue grew modestly in the first quarter.

Q2

A larger jump driven by new product launches.

Product A

Outperformed expectations by 18%.

Product B

Closed to plan.

Q3

Steady performance.

Q4

Year-end push exceeded targets.
